## Rebuildable Ball Joints, More Performance for Your Dollar

QA1's Ultimate Ball Joint has a unique patented design that is strong and extremely wear resistant. It's available in bolt-in, press-in and screw-in styles for all of the most popular racing applications.

**Ultimate Low Friction Operation** - Infinite Preload adjustment allows breakaway torque to be set as low as 0 ft. lbs. for a completely smooth, bind-free operation.

How to Rebuild a QA1 Ball ...

**Wear Resistant Design** - Precision tolerance ball-to-race conformity results in even load distribution for unsurpassed wear resistance. Precision ground 52100 bearing steel race ensures long life and ultra-smooth operation.

**On-the-Car Adjustability** - Infinite preload adjustment. No need to remove the ball joint from the car for adjustment.

**Self-Lubricating** - Fully greasable enhanced by self-lubricating components to ensure smooth operation.

**Multiple Stud Lengths Available** - Various ball studs are available for easy geometry changes. Fine tune your roll center.

**Owner Rebuildable** - Rebuilding is simple. All parts are replaceable at economical prices.
